

Client Project Case Study:

Title of Project:	Structured Asset management in the Government Civil Estate
Thomson Bethune's Role:	Workshop facilitator in Asset Management and Estate Rationalisation
Client Sector:	Public Sector – Office of Government Commerce
Client:	The University of Leeds
Project Cost:	Not applicable
Location:	London and Leeds
Date:	Jan 2006

Project Scope:	
Background to the project:	The project was to examine how a structured asset management service could be introduced into central Government civil departments with a view to making substantial improvements and savings in the overall Government property portfolio. This was achieved through examining best practice asset management tools and techniques and how they could be incorporated into the UK Government's civil estate with a view to savings being produced through estate rationalisation.
The value Thomson Bethune added to this project:	Thomson Bethune's expertise in Value and Asset Management workshop facilitation gained in over 200 case studies meant that the exercise was extremely effective with new techniques and tools being adopted and implemented within the client organisation. One of the tools used and implemented was a road capability map to enable departments to establish where they are presently and where they require to be in the future in respect of asset management.
