

# Client Project Case Study:

<b>Title of Project:</b>	Capital Allowances for Stadium House
<b>Thomson Bethune's Role:</b>	Calculate the value of the total expenditure which qualifies for machinery and plant allowances
<b>Client Sector:</b>	Commercial
<b>Client:</b>	Kingdom Property Group Ltd
<b>Project Cost:</b>	N/A
<b>Location:</b>	Livingston, Edinburgh
<b>Date:</b>	November 2010

<b>Project Scope:</b>	
<b>Background to the project:</b>	<p>The Client who purchased the property in December 2007, are entitled to claim capital allowances on the buildings qualifying machinery and plant. The capital expenditure incurred on these assets reduces the client's taxable profits or income.</p> <p>Thomson Bethune prepared a report, which details and calculates the total expenditure that qualifies for machinery and plant allowances. This report provides information which is utilised by French Duncan in preparing the year end accounts for the client, which are then submitted to HM Revenue and Customs.</p>
<b>The value Thomson Bethune added to this project:</b>	<p>We utilised our cost and construction knowledge to maximise the value of the qualifying machinery and plant.</p> <p>The outcomes of this exercise will be reviewed once the client's year end accounts have been compiled.</p>
