

Client Project Case Study:

Title of Project:	Strategic briefing Study for New Library Project
Thomson Bethune's Role:	Asset Managers, Workshop Facilitators and Cost Consultant
Client Sector:	Education
Client:	The Open University
Project Cost:	£8M
Location:	Milton Keynes, Buckinghamshire
Date:	2000.

Project Scope:	
Background to the project:	The University had a requirement to erect a new library. We were employed as part of an asset management team to consider existing proposals in the context of the strategic needs of the University. This study resulted in a further series of studies which created a detailed brief for the project and considered the most appropriate location for the new building. The study team included strategic business skills, value and risk management skills, capital and whole life cost consultancy skills, architectural and strategic briefing skills, structural and building services engineering skills and also used the Client's existing technical and user skills in the study.
The value Thomson Bethune added to this project:	Thomson Bethune utilised a number of in house skills such as asset management, workshop facilitation and capital and whole life cost management and brought together a team of recognised architectural, structural and building services engineering, project briefing and strategic planning experts to augment the study team and ensure a comprehensive study was delivered.
