

Client Project Case Study:

Title of Project:	Move Management associated with the Main Library Redevelopment Project
Thomson Bethune's Role:	Provision of project management, value management, move management services and where required provision of quantity surveying services and CDM Co-ordinator services on specific projects required as a result of the moves required to facilitate the execution of the Main Library Redevelopment Project
Client Sector:	Public Sector – Higher Education
Client:	The University of Edinburgh
Project Cost:	£1.3M carried out over multiple phases.
Location:	Edinburgh, Scotland
Date:	Dec 2008 to Mid 2014

Project Scope:	
Background to the project:	TB formulated the move strategy to be carried out in conjunction with the redevelopment work within the Main Library. The works had all to be carried out while maintaining a fully open Library Service and Library Building. The strategy was reviewed and amended as the project was undertaken, decants of staff and collections were organised, temporary facilities erected and collections moved to their final locations all to suit the requirements of the Main Library Redevelopment Project.
The value Thomson Bethune added to this project:	The co-ordinated services and reviews were of great benefit to the Library client in this very complex project where the Main Library was kept open and functioning during the Main Refurbishment works. At present the redevelopment is about 65% complete with about three years still to run before it is finally complete.
